#### 1.0 GENERAL DESCRIPTION

#### 1.1 Introduction

HannStar Display model HSD070IDW1-A22/A23 is a color active matrix thin film transistor (TFT) liquid crystal display (LCD) that uses amorphous silicon TFT as a switching device. This model is composed of a TFT LCD panel, a driving circuit and a back light system. This TFT LCD has a 7.0 (16:9) inch diagonally measured active display area with WVGA (800 horizontal by 480 vertical pixel) resolution.

#### 1.2 Features

- 7 (16:9 diagonal) inch configuration
- 6 bits + FRC driver with 1channel TTL interface
- LED Backlight
- Up/Down, Left/Right reversion selection
- RoHS/ Halogen Free Compliance

#### 1.3 Applications

- Mobile NB
- Digital Photo frame
- Multimedia applications and Others AV system

#### 1.4 General information

| Item                 |  | Specification                | Unit   |
|----------------------|--|------------------------------|--------|
| Outline Dimension    |  | 165.0 x 104.0 x 5.1 (Typ.)   | mm     |
| Display area         |  | 153.6(H) x 86.64(V)          | mm     |
| Number of Pixel      |  | 800 RGB (H) x 480(V)         | pixels |
| Pixel pitch          |  | 0.192(H) x 0.1805(V)         | mm     |
| Pixel arrangement    |  | RGB Vertical stripe          |        |
| Display mode         |  | Normally white               |        |
| Surface treatme      | Surface treatment Antiglare, Hard-Coating (3H) with EWV film |                              |        |
| Weight               |  | 120 (Typ.).                  | g      |
| Back-light           |  | Single LED (Side-Light type) |        |
| Power<br>Consumption | B/L System   | 1.68(Max.)                   | W      |

#### 1.5 Mechanical Information

|                           | Item           | Min.  | Тур.  | Max.  | Unit |
|---------------------------|----------------|-------|-------|-------|------|
| Madula                    | Horizontal (H) | 164.7 | 165.0 | 165.3 | mm   |
| Module<br>Size            | Vertical (V)   | 103.7 | 104.0 | 104.3 | mm   |
| Size                      | Depth (D)      | _     | 5.1   | 5.4   | mm   |
| Weight (Without inverter) |                | _     | 130   | _     | g    |

#### 2.0 ABSOLUTE MAXIMUM RATINGS

#### 2.1 Electrical Absolute Rating

#### 2.1.1 TFT LCD Module

| Item                     | Symbol    | Min. | Max.     | Unit | Note   |
|--------------------------|-----------|------|----------|------|--------|
| Power supply voltage     | Vcc       | -0.3 | 6.0      | V    | GND=0  |
|                          | $V_{GH}$  | 0.3  | 40       | V    | GND=0  |
|                          | $V_{GL}$  | -20  | 0.3      | V    | GND=0  |
|                          | $AV_DD$   | 0.5  | 15       | V    | AGND=0 |
|                          | $V_{COM}$ | 0    | 6        | V    |        |
| Logic Signal Input Level | $V_{l}$   | -0.3 | Vcc +0.3 | V    |        |

#### 2.1.2 Back-Light Unit

| Item        | Symbol         | Тур. | Max. | Unit | Note       |
|-------------|----------------|------|------|------|------------|
| LED current | Ι <sub>L</sub> | 140  | _    | mA   | (1) (2)(3) |
| LED voltage | $V_L$          | 10.5 | _    | V    | (1) (2)(3) |

#### Note

- (1) Permanent damage may occur to the LCD module if beyond this specification. Functional operation should be restricted to the conditions described under normal operating conditions.
- (2) Ta =25±2°C
- (3) Test Condition: LED current 140 mA. The LED lifetime could be decreased if operating IL is larger than 140mA.

# 2.2 Environment Absolute Rating

| Item                  | Symbol           | Min. | Max. | Unit                   | Note |
|-----------------------|------------------|------|------|------------------------|------|
| Operating Temperature | T <sub>opa</sub> | -20  | 70   | $^{\circ}\!\mathbb{C}$ |      |
| Storage Temperature   | $T_{stg}$        | -30  | 80   | $^{\circ}\!\mathbb{C}$ |      |

## 3.2 Measuring Condition

■ Measuring surrounding: dark room

■ LED current I<sub>L</sub>: 140mA

■ Ambient temperature: 25±2°C

■ 15min. warm-up time.

#### 3.3 Measuring Equipment

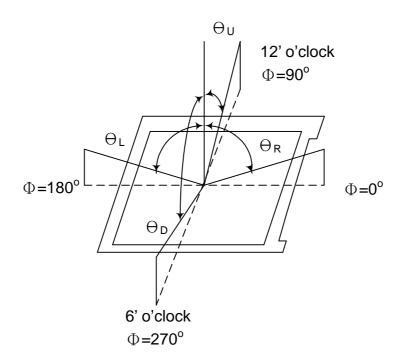

■ FPM520 of Westar Display technologies, INC., which utilized SR-3 for Chromaticity and BM-5A for other optical characteristics.

■ Measuring spot size: 20 ~ 21 mm

| Document No.   |                                   | Revision | 1.0  |

Note (5) Definition of brightness uniformity

 $Luminance uniformity = \frac{\text{(Min Luminance of 9 points)}}{\text{(Max Luminance of 9 points)}} \times 100\%$ 

- **Note (6)** Rubbing Direction (The different Rubbing Direction will cause the different optimal view direction.
- **Note (7)** Measured at the brightness of the panel when all terminals of LCD panel are electrically open.

#### 6.2 Back-Light Unit

The backlight system is an edge-lighting type with 21 LED.

The characteristics of the LED are shown in the following tables.

| Item                    | Symbol | Min.   | Тур. | Max. | Unit | Note   |
|-------------------------|--------|--------|------|------|------|--------|
| LED current             | IL     |        | 140  | _    | mA   | (2)    |
| LED voltage             | VL     |        | 10.5 | _    | V    |        |
| Operating LED life time | Hr     | 20,000 | _    | _    | Hour | (1)(2) |

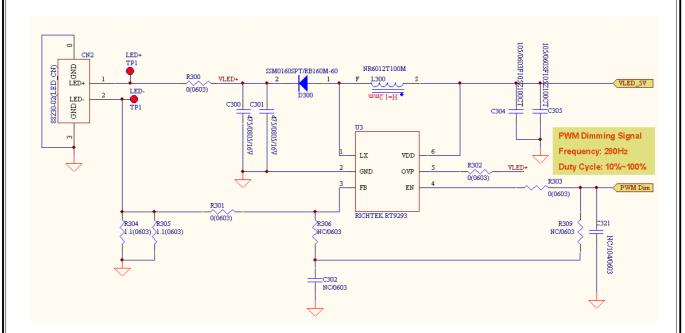

- Note (1) LED life time (Hr) can be defined as the time in which it continues to operate under the condition: Ta=25±3 °C, typical IL value indicated in the above table until the brightness becomes less than 50%.
- Note (2) The "LED life time" is defined as the module brightness decrease to 50% original brightness at Ta=25°C and IL=140mA. The LED lifetime could be decreased if operating IL is larger than 140mA. The constant current driving method is suggested.

|----------------|-----------------------------------|----------|-------|
| Document No.   |                                   | Revision | 1.0   |

#### 11.0 GENERAL PRECAUTION

#### 11.1 Use Restriction

This product is not authorized for use in life supporting systems, aircraft navigation control systems, military systems and any other application where performance failure could be life threatening or otherwise catastrophic.

#### 11.2 Disassembling or Modification

Do not disassemble or modify the module. It may damage sensitive parts inside LCD module, and may cause scratches or dust on the display. HannStar does not warrant the module, if customers disassemble or modify the module.

#### 11.3 Breakage of LCD Panel

- 11.3.1.If LCD panel is broken and liquid crystal spills out, do not ingest or inhale liquid crystal, and do not contact liquid crystal with skin.
- 11.3.2. If liquid crystal contacts mouth or eyes, rinse out with water immediately.
- 11.3.3. If liquid crystal contacts skin or cloths, wash it off immediately with alcohol and rinse thoroughly with water.
- 11.3.4. Handle carefully with chips of glass that may cause injury, when the glass is broken.

#### 11.4 Electric Shock

- 11.4.1. Disconnect power supply before handling LCD module.
- 11.4.2. Do not pull or fold the LED cable.
- 11.4.3. Do not touch the parts inside LCD modules and the fluorescent LED's connector or cables in order to prevent electric shock.

#### 11.5 Absolute Maximum Ratings and Power Protection Circuit

- 11.5.1. Do not exceed the absolute maximum rating values, such as the supply voltage variation, input voltage variation, variation in parts' parameters, environmental temperature, etc., otherwise LCD module may be damaged.
- 11.5.2. Please do not leave LCD module in the environment of high humidity and high temperature for a long time.
- 11.5.3. It's recommended to employ protection circuit for power supply.

#### 11.6 Operation

- 11.6.1 Do not touch, push or rub the polarizer with anything harder than HB pencil lead.
- 11.6.2 Use fingerstalls of soft gloves in order to keep clean display quality, when persons handle the LCD module for incoming inspection or assembly.
- 11.6.3 When the surface is dusty, please wipe gently with absorbent cotton or other soft material.

| Document Title | HSD070IDW1-A Formal Specification | Page No. | 27/27 |
|----------------|-----------------------------------|----------|-------|
| Document No.   |                                   | Revision | 1.0   |

- 11.6.4 Wipe off saliva or water drops as soon as possible. If saliva or water drops contact with polarizer for a long time, they may causes deformation or color fading.
- 11.6.5 When cleaning the adhesives, please use absorbent cotton wetted with a little petroleum benzine or other adequate solvent.

#### 11.7 Mechanism

Please mount LCD module by using mouting holes arranged in four corners tightly.

#### 11.8 Static Electricity

- 11.8.1 Protection film must remove very slowly from the surface of LCD module to prevent from electrostatic occurrence.
- 11.8.2. Because LCD module use CMOS-IC on circuit board and TFT-LCD panel, it is very weak to electrostatic discharge. Please be careful with electrostatic discharge. Persons who handle the module should be grounded through adequate methods.

#### 11.9 Strong Light Exposure

The module shall not be exposed under strong light such as direct sunlight. Otherwise, display characteristics may be changed.

#### 11.10 Disposal

When disposing LCD module, obey the local environmental regulations.
