GENERAL DESCRIPTION

DESCRIPTION

LTN141AT16 is a color active matrix TFT (Thin Film Transistor) liquid crystal display (LCD) that uses amorphous silicon TFT as a switching devices. This model is composed of a TFT LCD panel, a driver circuit and a backlight unit. The resolution of a 14.1" contains 1,280 x 800 pixels and can display up to 262,144 colors. 6 O'clock direction is the Optimum viewing angle.

FEATURES

- · High contrast ratio, high aperture structure
- 1280 x 800 pixels resolution
- · Low power consumption
- LED BLU Structure with embeded LED driver
- DE (Data enable) only mode
- eDP (Display Port) interface (1lane @ 2.7GHz)
- On board EDID chip
- RoHS compliance
- PVC free compliance
- BFR free compliance
- AS free compliance

APPLICATIONS

- Notebook PC
- If the usage of this product is not for PC application, but for others, please contact SEC.

GENERAL INFORMATION

Item	Specification	Unit	Note
Display area	303.36(H) x 189.6(V) (14.1" diagonal)	mm	
Driver element	a-Si TFT active matrix		
Display colors	262,144		
Number of pixel	1280 x RGB(3) x 800	pixel	16 : 10
Pixel arrangement	RGB vertical stripe		
Pixel pitch	0.2370(H) x 0.2370(V) (TYP.)	mm	
Display Mode	Normally white		
Surface treatment	Haze 25, Hard-Coating 3H		Antiglare

Mechanical Information

	Item	Min.	Тур.	Max.	Unit	Note
	Horizontal (H)	319.0	319.5	320.0	mm	
Module size	Vertical (V)	205.0	205.5	206.0	mm	-
3120	Depth (D)	-	-	5.5	mm	-
	Weight	-	-	375	g	-

1. ABSOLUTE MAXIMUM RATINGS

1.1 ENVIRONMENTAL ABSOLUTE RATINGS

Item	Symbol	Min.	Max.	Unit	Note
Storage temperate	TSTG	-20	60	°C	(1)
Operating temperate (Temperature of glass surface)	TOPR	0	50	°C	(1)
Shock (non-operating)	Snop	-	240	G	(2),(4)
Vibration (non-operating)	Vnop	-	2.41	G	(3),(4)

Note (1) Temperature and relative humidity range are shown in the figure below. 95 % RH Max. $(40 \, ^{\circ}\text{C} \ge \text{Ta})$

Maximum wet - bulb temperature at 39 $^{\circ}$ C or less. (Ta > 40 $^{\circ}$ C) No condensation

- (2) 2ms, half sine wave, one time for $\pm X$, $\pm Y$, $\pm Z$.
- (3) 5 500 Hz, random vibration, 30min for X, Y, Z.
- (4) At testing Vibration and Shock, the fixture in holding the Module to be tested have to be hard and rigid enough so that the Module would not be twisted or bent by the fixture.

--

2. OPTICAL CHARACTERISTICS

The following items are measured under stable conditions. The optical characteristics should be measured in a dark room or equivalent state with the methods shown in Note (5). Measuring equipment: TOPCON BM-5A and PR-650

* Ta = 25 ± 2 °C, VDD=3.3V, fv= 60Hz, fDCLK = 70.74MHz, IL = 20 mArms

Doc.No. LTN141AT16-0 Rev.No 04-A01-S-100506 Page 7 / 31

Note 1) Definition of Viewing Angle : Viewing angle range ($10 \le C/R$, $100 \le C/R$)

Approval

Note 2) Definition of Contrast Ratio (CR): Ratio of gray max (Gmax) ,gray min (Gmin) at 5 points(4, 5, 7, 9, 10)

$$CR = \frac{CR(4) + CR(5) + CR(7) + CR(9) + CR(10)}{5}$$

Points : (4), (5), (7), (9), (10) at the figure of Note (6).

Note 3) Definition of Response time:

Note 4) Definition of Average Luminance of White: measure the luminance of white at 5 points.

Doc.No. LTN141AT16-0 Rev.No.	04-A01-S-100506	Page	8 / 31
------------------------------	-----------------	------	--------

Note 5) After stabilizing and leaving the panel alone at a given temperature for 30 min , the measurement should be executed. Measurement should be executed in a stable, windless, and dark room. 30 min after lighting the backlight. This should be measured in the center of screen. Environment condition: Ta = 25 ± 2 °C

[Optical characteristics measurement setup]

Note 6) Definition of 13 points white variation (δ L), [11 ~ 99]

$$\delta_L = \frac{\text{Maximum luminance of 13 points}}{\text{Minimum luminance of 13 points}}$$

3. ELECTRICAL CHARACTERISTICS

Approval

3.1 TFT LCD MODULE

Ta= 25 ± 2°C

Item	Symbol	Min.	Тур.	Max.	Unit	Note

Timing	Description	Reqd.	Limits	s (ms)	Notes
Parameter	Description	Ву	Min	Max	Notes
T1	Power rail rise time, 10% to 90%	Source	0.5	10	
T2	Delay from LCD Vcc to black video generation	Sink	0	200	Prevents display noise until valid video data is received from Source (see note1 below)
Т3	Delay from LCD Vcc to HPD high	Sink	0	200	Sink Aux Channel must be operational upon HPD high
T4	Delay from HPD high to link training initialization	Source	ı	ı	Allows for Source to read Link capability and initialize
T5	Link training duration	Source	1	-	Dependant on Source link training protocol
T6	Link idle	Source	-	-	Min accounts for required BS-Idle pattern. Max allows for Source frame synchronization
Т7	Delay from valid video data from Source to video on display	Sink	0	50	Max allows Sink validate video data and timing
Т8	Delay from valid video data from Source to backlight	Source	ı	-	Source must assure display video is stable
Т9	Delay from backlight disable to end of valid video data	Source	ı	1	Source mush assure backlight is no longer illuminated (see note 1 below)
T10	Delay from end of valid video data from Source to power off	Source	0	500	
T11	Power rail fall time, 90% to 10%	Source		10	
T12	Power off time	Source	500	-	

Power Sequence Timing Parameters

- Note 1) The Sink must include the ability to generate black video autonomously. The Sink must automatically enable black video under the following conditions:
 - Upon LCD Vcc power-on (within T2 max)
 - When the "NoVideoStream_Flag" (VB-ID Bit 3) is received from the Source (at the end of T9)
 - When no Main Link data, or invalid video data, is received from the Source. Black video must be displayed within 50ms (max) from the start of either condition. Video data can be deemed invalid based on MSA and timing information, for example.
- Note 2) The Sink may implement the ability to disable the black video function, as described in Notes 1, above, for system development and debugging purposes.
- Note 3) The Sink must support Aux Channel polling by the Source immediately following LCD Vcc power-on without causing damage to the Sink device (the Source can re-try if the Sink is not ready). The Sink must be able to respond to an Aux Channel transaction with the time specified within T3 max.

8. PACKING

1. CARTON(Internal Package)

- **Approval**
- (1) Packing Form
 Corrugated Cardboard box and Corrupad form as shock absorber
- (2) Packing Method

Note 1) Total Weight: Approximately 5.5 kg

2) Acceptance number of piling: 10 sets

3) Carton size : 408(W) * 325(D) * 294(H)

Doc.No. LTN141AT16-0 Rev.No 04-A01-S-100506 Page 24

No	Part name	Quantity
1	Static electric protective sack	10
2	Packing case (Inner box) included shock absorber	1 set
3	Pictorial marking	2 pcs

Carton

Approval

9. MARKINGS & OTHERS

A nameplate bearing followed by is affixed to a shipped product at the specified location on each product.

(2) Revision : Three letters

(3) Lot number : X X X X XXX XXX XX XX

1 set

NOTE 1). This code indicating year is omitted in the products of KIHEUNG site.

(4) Nameplate Indication(Following example is only for reference)

Parts name : LTN141AT16-0 Lot number : xxxxxxxxxx

Inspected work week: 0901 Number (2009 year 1st week)

DP/N : Dell Part No ("**0WF66C**" is for LTN141AT16-0)

A01 : Product Revision Code

 Doc.No.
 LTN141AT16-0
 Rev.No

10. GENERAL PRECAUTIONS

Approval

1. Handling

- (a) When the module is assembled, It should be attached to the system firmly using every mounting holes. Be careful not to twist and bend the modules.
- (b) Refrain from strong mechanical shock and / or any force to the module. In addition to damage, this may cause improper operation or damage to the module and CCFT back-light.
- (c) Note that polarizers are very fragile and could be easily damaged. Do not press or scratch the surface harder than a HB pencil lead.
- (d) Wipe off water droplets or oil immediately. If you leave the droplets for a long time, Staining and discoloration may occur.
- (e) If the surface of the polarizer is dirty, clean it using some absorbent cotton or soft cloth.
- (f) The desirable cleaners are water, IPA (Isoprophyl Alcohol) or Hexane.

 Do not use Ketone type materials(ex. Acetone), Ethyl alcohol, Toluene, Ethyl acid or Methyl chloride. It might permanent damage to the polarizer due to chemical reaction.
- (g) If the liquid crystal material leaks from the panel, it should be kept away from the eyes or mouth . In case of contact with hands, legs or clothes, it must be washed away thoroughly with soap.
- (h) Protect the module from static, it may cause damage to the C-MOS Gate Array IC.
- (i) Use fingerstalls with soft gloves in order to keep display clean during the incoming inspection and assembly process.
- (j) Do not disassemble the module.
- (k) Do not pull or fold the lamp wire.
- (I) Do not adjust the variable resistor which is located on the back side.
- (m) Protection film for polarizer on the module shall be slowly peeled off just before use so that the electrostatic charge can be minimized.
- (n) Pins of I/F connector shall not be touched directly with bare hands.

Doc.No. LTN141AT16-0 Rev.No 04-A01-S-100506 Page 27 / 3

2. STORAGE

Approval

- (a) Do not leave the module in high temperature, and high humidity for a long time. It is highly recommended to store the module with temperature from 0 to 35 °C and relative humidity of less than 70%.
- (b) Do not store the TFT-LCD module in direct sunlight.
- (c) The module shall be stored in a dark place. It is prohibited to apply sunlight or fluorescent light during the store.

3. OPERATION

- (a) Do not connect, disconnect the module in the "Power On" condition.
- (b) Power supply should always be turned on/off by following item 6.3 "Power on/off sequence ".
- (c) Module has high frequency circuits. Sufficient suppression to the electromagnetic interference shall be done by system manufacturers. Grounding and shielding methods may be important to minimize the interference.
- (d) The cable between the back-light connector and its inverter power supply shall be a minimized length and be connected directly. The longer cable between the back-light and the inverter may cause lower luminance of lamp(CCFT) and may require higher startup voltage (Vs).
- (e) The standard limited warranty is only applicable when the module is used for general notebook applications. If used for purposes other than as specified, SEC is not to be held reliable for the defective operations. It is strongly recommended to contact SEC to find out fitness for a particular purpose.
- (f) The operation at 40hz might cause flicker.

4. OTHERS

- (a) Ultra-violet ray filter is necessary for outdoor operation.
- (b) Avoid condensation of water. It may result in improper operation or disconnection of electrode.
- (c) Do not exceed the absolute maximum rating value. (the supply voltage variation, input voltage variation, variation in part contents and environmental temperature, so on) Otherwise the module may be damaged.
- (d) If the module displays the same pattern continuously for a long period of time, it can be the situation when the image "sticks" to the screen.
- (e) This module has its circuitry PCB's on the rear side and should be handled carefully in order not to be stressed.
