Product Specification

1. General Description

The LP141X13(B1) is a Color Active Matrix Liquid Crystal Display with an integral Cold Cathode Fluorescent Lamp (CCFL) backlight system. The matrix employs a-Si Thin Film Transistor as the active element. It is a transmissive type display operating in the normally white mode. This TFT-LCD has 14.1 inches diagonally measured active display area with XGA resolution(768 vertical by 1024 horizontal pixel array). Each pixel is divided into Red, Green and Blue sub-pixels or dots which are arranged in vertical stripes. Gray scale or the brightness of the sub-pixel color is determined with a 6-bit gray scale signal for each dot, thus, presenting a palette of more than 262,144 colors.

The LP141X13(B1) has been designed to apply the interface method that enables low power, high speed, low EMI.

The LP141X13(B1) is intended to support applications where thin thickness, low power are critical factors and graphic displays are important. In combination with the vertical arrangement of the sub-pixels, the LP141X13(B1) characteristics provide an excellent flat display for office automation products such as Notebook PC.
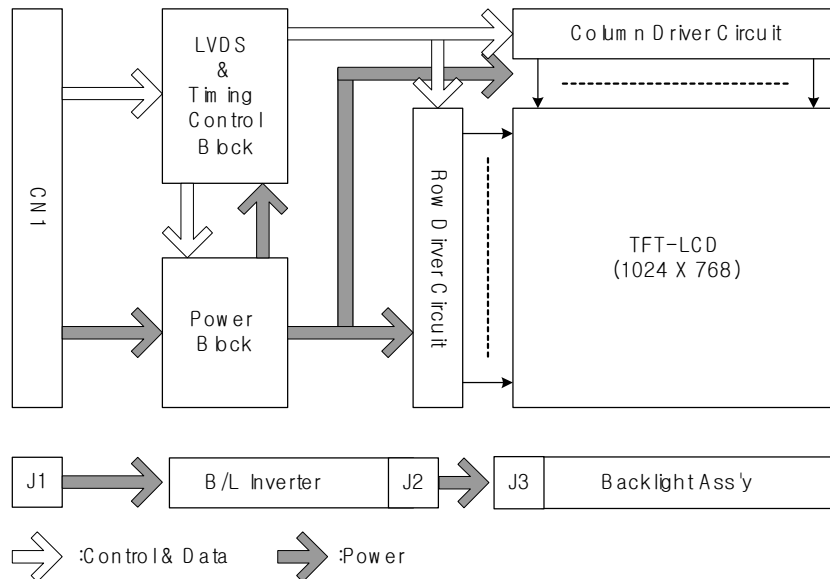

General Features

| Active Screen Size	14.1 inches(35.814cm) diagonal
Outline Dimension	299(H) × 226.5(V) × 5.5(D) mm (Typ.)
Pixel Pitch	0.279 mm × 0.279 mm
Pixel Format	1024 horiz. By 768 vert. Pixels RGB strip arrangement
Color Depth	6-bit, 262,144 colors
Luminance, White	150 cd/m^2(Min.), 5p average
Power Consumption	Total 5.0 Watt(Typ.)
Weight	435 g (Max.) w/o inverter and bracket, 450g(Max.) w/ inverter and bracket
Display Operating Mode	Transmissive mode, normally white
Surface Treatment	Hard coating(3H) Anti-glare treatment of the front polarizer

2. Absolute Maximum Ratings

The following are maximum values which, if exceeded, may cause faulty operation or damage to the unit.

Table 1. ABSOLUTE MAXIMUM RATINGS

Parameter	Symbol	Values		Units	Notes
		Min	Max		
Power Input Voltage	VCC	-0.3	4.0	Vdc	at 25 ± 5°C
Operating Temperature	TOP	0	50	°C	1
Storage Temperature	HST	-20	60	°C	1
Operating Ambient Humidity	HOP	10	90	%RH	1
Storage Humidity	HST	10	90	%RH	1

Note : 1. Temperature and relative humidity range are shown in the figure below.
Wet bulb temperature should be 39°C Max, and no condensation of water.

Dry Bulb Temperature [℃]
Product Specification

3. Electrical Specifications

3-1. Electrical Characteristics

The LP141X13(B1) requires two power inputs. One is employed to power the LCD electronics and to drive the TFT array and liquid crystal. The second input which powers the CCFL, is typically generated by an inverter. The inverter is an external unit to the LCD.

Table 2. ELECTRICAL CHARACTERISTICS

Parameter	Symbol	Values			Unit	Notes
		Min	Typ	Max		
MODULE :						
Power Supply Input Voltage	VCC	3.0	3.3	3.6	V_{DC}	
Power Supply Input Current	I_{CC}	-	365	515	mA	1
Power Consumption	Pc	-	1.2	1.7	Watt	1
Differential Impedance	Zm	90	100	110	Ohm	2
LAMP :						
Operating Voltage	V_{BL}	615(6.5mA)	630(6mA)	795(3.0mA)	V_{RMS}	
Operating Current	I_{BL}	3.0	6.0	6.5	mA_{RMS}	3
Operating Frequency	f_{BL}	50	65	80	kHz	
Discharge Stabilization Time	Ts	-	-	3	Min	4
Life Time		10,000	-	-	Hrs	5
INVERTER :						
Input Voltage	V_{IN}	9.0	14.4	21.0	V_{DC}	
Input Current	I_{IN}	-	340	390	mA	6
Input Power Consumption	P_{IN}	4.17	4.90	5.62	W	6
Backlight On/Off Control	FPVEE_High	2.0	-	5.25	V_{DC}	
	FPVEE_Low	-0.3	-	0.8	V_{DC}	
Backlight Adjust (I_{BL} Control)		FF_H	-	00_H	-	
Output Voltage	V_{OUT}	580	680	780	V_{RMS}	6
Output Current (Aging 30minutes)	I_{OUT_FF}	-	2.0	2.3	mA_{RMS}	7
	I_{OUT_00}	5.5	6.0	6.5	mA_{RMS}	7
Operating Frequency	Freq.	45	60	75	KHz	7
Output Power Consumption	P_{OUT}	3.98	4.1	4.68	W	6
Open Lamp Voltage	V_{OPEN}	1450	-	-	V_{RMS}	8
Efficiency	η	75	-	-	%	9
Striking Time	T_S	0.6	1.0	1.4	sec	10

Note)
1. The specified current and power consumption are under the Vcc = 3.3V , 25℃, fv = 60Hz condition whereas full black pattern is displayed and fv is the frame frequency.
2. This impedance value is needed to proper display and measured form LVDS Tx to the mating connector.
3. The typical operating current is for the typical surface luminance (L_{WH}) in optical characteristics.

Product Specification

Note)
4. Define the brightness of the lamp after being lighted for 5 minutes as 100%, Ts is the time required for the brightness of the center of the lamp to be not less than 95%.
5. The life time is determined as the time at which brightness of lamp is 50% compare to that of initial value at the typical lamp current.
6. V_{IN} = 14.4V, I_{OUT} = 6.0mA.
7. V_{IN} = 9 ~ 21V.
8. No Load, V_{IN} = 9V.
9. V_{IN} =9V, 00_H.
10. No Load, V_{IN} = 9 ~ 21V, 00_H

3-2. Interface Connections

This LCD employs two interface connections, a 30 pin connector is used for the module electronics interface and the other connector is used for the integral backlight system.
The electronics interface connector is a model FI-XB30SR-HF11 manufactured by JAE.

Table 3. MODULE CONNECTOR PIN CONFIGURATION (CN1)

Pin	Symbol	Description	Notes

[LCD Module Rear View]

Product Specification

The inverter interface connector(J1) is a LVC-D20SFYG model manufactured by Honda. The pin configuration for the connector is shown in the table below.

Table 4. BACKLIGHT INVERTER CONNECTOR PIN CONFIGURATION (J1)

Pin	Symbol	Description	Notes
1	V_{IN}	Power for the inverter	
2	V_{IN}	Power for the inverter	
3	V_{IN}	Power for the inverter	
4	NC	No connection	[Connector]
5	GND	Ground	LVC-D20SFYG, Honda
6	5V_SUS	Power for the control circuit	
7	5V_ALW	Power for storing a brightness values	[Connector pin arrangement]
8	GND	Ground	
9	SMB_DAT	Brightness data	
10	SMB_CLK	Clock for brightness data	
11	GND	Ground	
12	FPVEE	Enable for lamp turn on and off	
13	GND	Ground	
14~16	NC	No connection	
17	PANEL_ID3	1(OPEN)	
18	PANEL_ID2	1(OPEN)	
19	PANEL_ID1	1(OPEN)	
20	PANEL_ID0	1(OPEN)	

The backlight interface connector is a model BHSR-02VS-1, manufactured by JST. The mating connector part number is SM02B-BHSS-1 or equivalent.

Table 5. BACKLIGHT CONNECTOR PIN CONFIGURATION (J3)

Pin	Symbol	Description	Notes
1	HV	Power supply for lamp (High voltage side)	1
2	LV	Power supply for lamp (Low voltage side)	1

Notes : 1. The high voltage side terminal is colored pink and the low voltage side terminal is white

3-3. Signal Timing Specifications

This is the signal timing required at the input of the User connector. All of the interface signal timing should be satisfied with the following specifications and specifications of LVDS Tx/Rx for it's proper operation.

Table 6. TIMING TABLE

ITEM	Symbol		Min	Typ	Max	Unit	Note
DCLK	Frequency	fCLK	65	65	65	MHz	15.4ns
Hsync	Period	tHP	1206	1344	1364	tCLK	
	Width	tWH	8	136	240		
Vsync	Period	tVP	780	806	830	tHP	
	Width	tWV	2	-	-		
Data Enable	Horizontal back porch	tHBP	16	-	-	tCLK	
	Horizontal front porch	tHFP	16	-	-		
	Vertical back porch	tVBP	3	-	-	tHP	
	Vertical front porch	tVFP	2	-	-		

3-4. Signal Timing Waveforms

Condition : VCC =3.3V
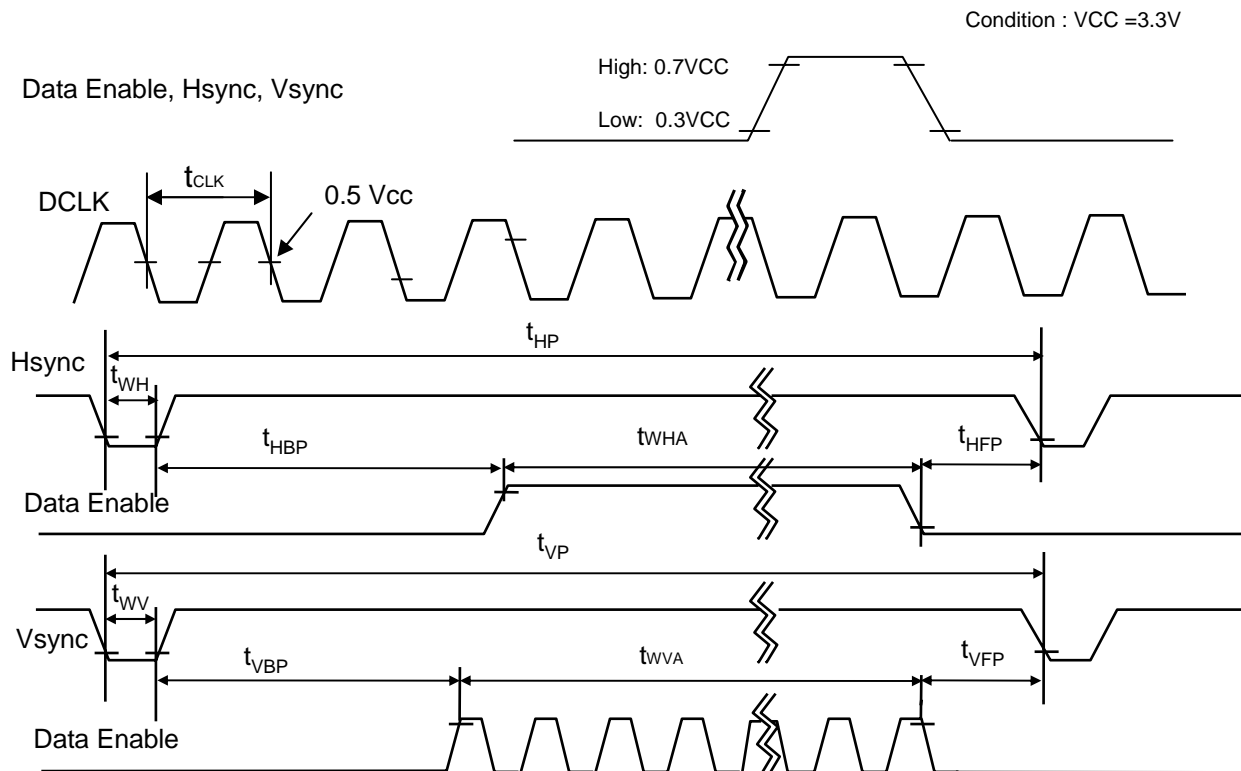

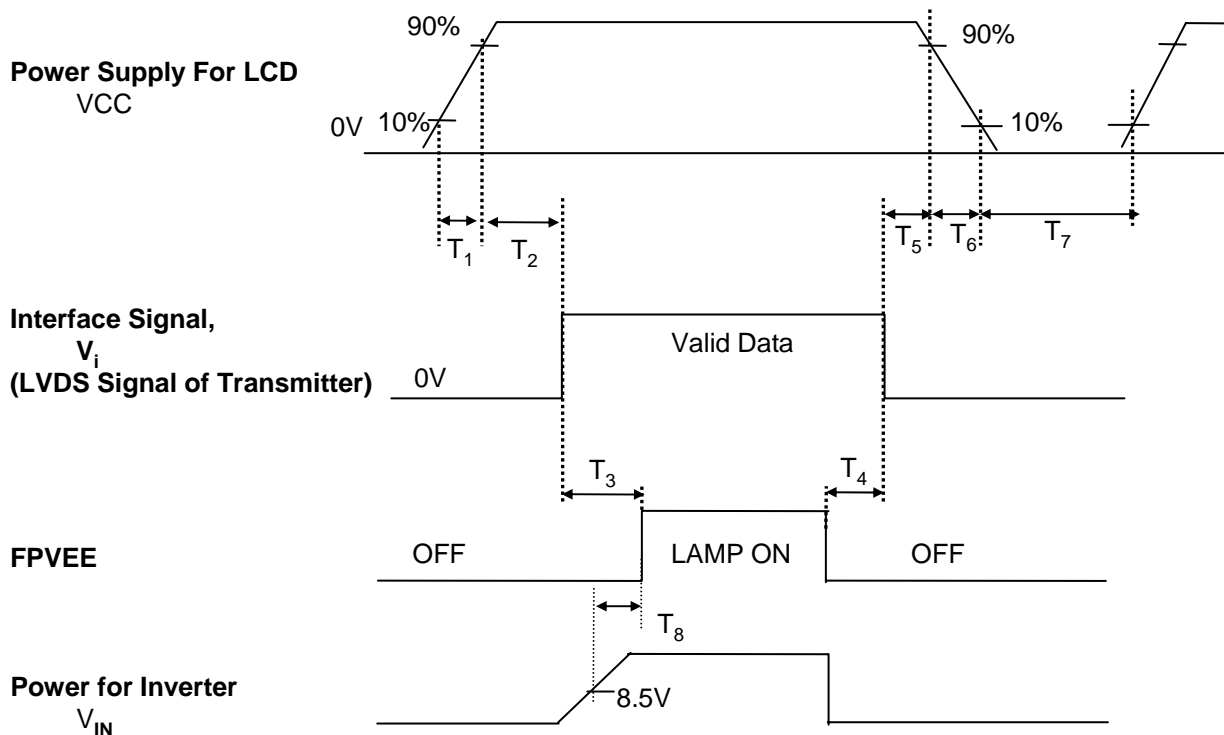

Product Specification

3-5. Color Input Data Reference

The brightness of each primary color (red,green and blue) is based on the 6-bit gray scale data input for the color ; the higher the binary input, the brighter the color. The table below provides a reference for color versus data input.

Table 7. COLOR DATA REFERENCE

Color		Input Color Data																		
		RED						GREEN						BLUE						
		MSB					LSB	MSB					LSB	MSB					LSB	
		R 5	R 4	R 3	R 2	R 1	R 0	G 5	G 4	G 3	G 2	G 1	G 0	B 5	B 4	B 3	B 2	B 1	B 0

Note)

1. Please avoid floating state of interface signal at invalid period.

2. When the interface signal is invalid, be sure to pull down the power supply for LCD VCC to 0V.

3. Lamp power must be turn on after power supply for LCD and interface signal are valid.

Product Specification

4. Optical Specification

Optical characteristics are determined after the unit has been 'ON' and stable for approximately 30 minutes in a dark environment at 25°C. The values specified are at an approximate distance 50cm from the LCD surface at a viewing angle of Φ and Θ equal to 0°.
FIG. 1 presents additional information concerning the measurement equipment and method.

### FIG. 1 Optical Characteristic Measurement Equipment and Method

Table 9. OPTICAL CHARACTERISTICS

Ta=25°C, VCC=3.3V, fv=60Hz, f_{CLK}= 65MHz, Iout = 6.0mA(SMB-DAT=00H)

Parameter	Symbol	Values Min	Values Typ	Values MAx	Units	Notes

Gray Scale			2.2			6

Product Specification

Note)
1. Contrast Ratio(CR) is defined mathematically as

$$\text{Contrast Ratio} = \frac{\text{Surface Luminance with all white pixels}}{\text{Surface Luminance with all black pixels}}$$

2. Surface luminance is the average of 5 point across the LCD surface 50cm from the surface with all pixels displaying white. For more information see FIG 1.

$$L_{WH} = \text{Average}(L_1, L_2, \ldots L_5)$$

3. The variation in surface luminance , The panel total variation (δ_{WHITE}) is determined by measuring L_N at each test position 1 through 13 and then defined as followed numerical formula. For more information see FIG 2.

$$\delta_{WHITE} = \frac{\text{Maximum}(L_1, L_2, \ldots L_{13}) - \text{Minimum}(L_1, L_2, \ldots L_{13})}{\text{Maximum}(L_1, L_2, \ldots L_{13})} \times 100$$

4. Response time is the time required for the display to transition from white to black (rise time, Tr_R) and from black to white(Decay Time, Tr_D). For additional information see FIG 3.

5. Viewing angle is the angle at which the contrast ratio is greater than 10. The angles are   determined for the horizontal or x axis and the vertical or y axis with respect to the z axis which is normal to the LCD surface. For more information see FIG 4.

6. Gray scale specification   * f_V=60Hz

Gray Level	Luminance [%] (Typ)

b) Location of Lot Mark

Serial NO. is printed on the label. The label is attached to the backside of the LCD module.
This is subject to change without prior notice.

8-2. Packing Form

a) Package quantity in one box : 10 pcs

b) Box Size : 301mm × 278mm × 355mm

9. PRECAUTIONS

Please pay attention to the followings when you use this TFT LCD module.

9-1. MOUNTING PRECAUTIONS

(1) You must mount a module using holes arranged in four corners or four sides.
(2) You should consider the mounting structure so that uneven force (ex. Twisted stress) is not applied to the module. And the case on which a module is mounted should have sufficient strength so that external force is not transmitted directly to the module.
(3) Please attach the surface transparent protective plate to the surface in order to protect the polarizer. Transparent protective plate should have sufficient strength in order to the resist external force.
(4) You should adopt radiation structure to satisfy the temperature specification.
(5) Acetic acid type and chlorine type materials for the cover case are not desirable because the former generates corrosive gas of attacking the polarizer at high temperature and the latter causes circuit break by electro-chemical reaction.
(6) Do not touch, push or rub the exposed polarizers with glass, tweezers or anything harder than HB pencil lead. And please do not rub with dust clothes with chemical treatment.
Do not touch the surface of polarizer for bare hand or greasy cloth.(Some cosmetics are detrimental to the polarizer.)
(7) When the surface becomes dusty, please wipe gently with absorbent cotton or other soft materials like chamois soaks with petroleum benzene. Normal-hexane is recommended for cleaning the adhesives used to attach front / rear polarizers. Do not use acetone, toluene and alcohol because they cause chemical damage to the polarizer.
(8) Wipe off saliva or water drops as soon as possible. Their long time contact with polarizer causes deformations and color fading.
(9) Do not open the case because inside circuits do not have sufficient strength.

9-2. OPERATING PRECAUTIONS

(1) The spike noise causes the mis-operation of circuits. It should be lower than following voltage :
V=± 200mV(Over and under shoot voltage)

(2) Response time depends on the temperature.(In lower temperature, it becomes longer.)
(3) Brightness depends on the temperature. (In lower temperature, it becomes lower.)
And in lower temperature, response time(required time that brightness is stable after turned on) becomes longer.
(4) Be careful for condensation at sudden temperature change. Condensation makes damage to polarizer or electrical contacted parts. And after fading condensation, smear or spot will occur.
(5) When fixed patterns are displayed for a long time, remnant image is likely to occur.
(6) Module has high frequency circuits. Sufficient suppression to the electromagnetic interference shall be done by system manufacturers. Grounding and shielding methods may be important to minimized the interference.

9-3. ELECTROSTATIC DISCHARGE CONTROL

Since a module is composed of electronic circuits, it is not strong to electrostatic discharge. Make certain that treatment persons are connected to ground through wrist band etc. And don't touch interface pin directly.

9-4. PRECAUTIONS FOR STRONG LIGHT EXPOSURE

Strong light exposure causes degradation of polarizer and color filter.

9-5. STORAGE

When storing modules as spares for a long time, the following precautions are necessary.

(1) Store them in a dark place. Do not expose the module to sunlight or fluorescent light. Keep the temperature between 5°C and 35°C at normal humidity.
(2) The polarizer surface should not come in contact with any other object.
   It is recommended that they be stored in the container in which they were shipped.

9-6. HANDLING PRECAUTIONS FOR PROTECTION FILM

(1) The protection film is attached to the bezel with a small masking tape.
   When the protection film is peeled off, static electricity is generated between the film and polarizer.
   This should be peeled off slowly and carefully by people who are electrically grounded and with well ion-blown equipment or in such a condition, etc.
(2) When the module with protection film attached is stored for a long time, sometimes there remains a very small amount of glue still on the bezel after the protection film is peeled off.
(3) You can remove the glue easily. When the glue remains on the bezel surface or its vestige is recognized, please wipe them off with absorbent cotton waste or other soft material like chamois soaked with normal-hexane.
