FEATURES

(1) 12.1 XGA color display with High Luminance
(2) Built in Long Life Lamps(MTTF:50,000 h)
    (Condition/ Ta:25°C, I_{FL}:6mA(rms)(continuing lighting), f_{FL}:40kHz)
(3) Replaceable structure of lamp units
(4) Analog scaling board(VNR15C458E-IFB) attachable to LCD backward
(5) Recommendable inverter(VNR12C289-INV) attachable to LCD backward
(6) Reverse scan function

Note 1) Refer to "Timing Chart" and LVDS (THC63LVDF84A-85) specifications by THine Electronics, Inc.
corporation.

Note 2) If DE is fixed to "H" or "L" level for certain period while NCLK is supplied, the panel displays black with some flicker.

Note 3) If NCLK is fixed to "H" or "L" level for certain period while DE is supplied, the panel may be damaged.

Note 4) Please adjust LCD operating signal timing and FL driving frequency, to optimize the display quality.
There is a possibility that flicker is observed by the interference of LCD operating signal timing and FL driving
condition (especially driving frequency), even if the condition satisfies above timing specifications and
recommended operating conditions shown in 3.

Note5) Do not make tv, $tvhd$ and tvds fluctuate.
If tv, $tvhd$, and $tvds$ are fluctuate, the panel displays black.

Note6) In case of using the long frame period, the deterioration of display quality, noise etc. may be occurred.

Note7) NCLK count of each Horizontal Scanning Time should be always the same.
V-Blanking period should be "n" X "Horizontal Scanning Time". (n: integer)
Frame period should be always the same.

RELIABILITY TEST

TEST CONDITIONS

  1) The module should be driven and inspected under normal test conditions.
  2) The module should not have condensation of water (moisture) on the module.
  3) The module should be inspected after two or more hours storage in normal conditions (15 - 35°C,
     45 - 65%(RH)).
  4) A module shall be used only for one test.

SPECIFICATIONS
    The module shall have no failure in the following reliability test items.

Test Item	Test Conditions	Result
High Temperature Operation [1]	50°C 192 h	OK
High Temperature Storage [2]	60°C 192 h	OK
High Temperature High Humidity operation [1]	50°C 80% 192 h	OK
Low Temperature Operation [1]	0°C 192 h	OK
Low Temperature Storage [2]	-20°C 192 h	OK
Temperature Shock [2]	-20°C ⇔ 60°C 0.5h 0.5h 50 cycles	OK
Mechanical Vibration [2]	10 - 200 - 10Hz sweep/cycle, $1.5\times9.8m/s^2$ constant, X.Y.Z each directions, 0.5h each	OK
Mechanical Shock [2]	$50\times9.8m/s^2$, 20ms, ±X, ±Y, ±Z direction, one time each	OK

    Note 1) Operating
    Note 2) Non-Operating

    Definitions of failure for judgment shall be as follows:
      1) Function of the module should be maintained.
      2) Current consumption should be smaller than the specified value.
      3) Appearance and display quality should not have distinguished degradation.
      4) Luminance should be larger than 50% of the minimum value specified in OPTICAL SPECIFICATION.

⚠ **FOR SAFETY**

LCD module is generally designed with precise parts to achieve light weighted thin mechanical dimensions.
In using our Modules, make certain that you fully understand and put into practice the warnings and safety precautions detailed in Engineering Information No.EE-N001,"CAUTIONS AND INSTRUCTIONS FOR TOSHIBA LCD MODULES".
Refer to individual specifications and TECHNICAL DATA sheets (hereinafter called "TD") for more detailed technical information.

1) SPECIAL PURPOSES

A) Toshiba Matsushita Display Technology's Standard LCD Modules have not been customized for operation in extreme environments or for use in applications where performance failures could be life-threatening or otherwise catastrophic.

B) Since Toshiba Matsushita Display Technology's Standard LCD Modules have not been designed for operation in extreme environments, they must never be used in devices that will be exposed to abnormally high levels of vibration or shock which exceed Toshiba Matsushita Display Technology's published specification limits.

C) In addition, since Toshiba Matsushita Display Technology Standard LCD Modules have not been designed for use in applications where performance failures could be life-threatening or catastrophic, they must never be installed in aircraft navigation control systems (such as, but not limited to Traffic Collision Avoidance System and Air Traffic Indicator), in military defense or weapons systems, in critical industrial process-control systems (e.g., those involved in the production of nuclear energy), or in critical medical device or patient life-support systems.

2) DISASSEMBLING OR MODIFICATION

DO NOT DISASSEMBLE OR MODIFY the module. It may damage sensitive parts inside LCD module, and may cause scratches or dust on the display.
Toshiba Matsushita Display Technology doses not warrant the module, if customer disassembled or modified it.

3) BREAKAGE OF LCD PANEL

DO NOT INGEST liquid crystal material, DO NOT INHALE this material, and DO NOT CONTACT the material with skin, if LCD panel is broken and liquid crystal material spills out.
If liquid crystal material comes into mouth or eyes, rinse mouth or eyes out with water immediately.
If this material contact with skin or cloths, wash it off immediately with alcohol and rinse thoroughly with water.

4) GLASS OF LCD PANEL

BE CAREFUL WITH CHIPS OF GLASS that may cause injuring fingers or skin, when the glass is broken.

5) ELECTRIC SHOCK

DISCONNECT POWER SUPPLY before handling LCD module.
DO NOT TOUCH the parts inside LCD module and the fluorescent lamp's connector or cables in order to prevent electric shock, because high voltage is supplied to these parts from the inverter unit while power supply is turned on.

6) ABSOLUTE MAXIMUM RATINGS AND POWER PROTECTION CIRCUIT

DO NOT EXCEED the absolute maximum rating values under the worst probable conditions caused by the supply voltage variation, input voltage variation, variation in parts' constants, environmental temperature, etc., otherwise LCD module may be damaged.
Employ protection circuit for power supply, whenever the specification or TD specifies it.
Suitable protection circuit should be applied for each system design.

7) DISPOSAL
When dispose LCD module, obey to the applicable environmental regulations.
